The accompanying unaudited financial statements have been prepared in accordance with the instructions to Form 10-Q and do not include all of the information and disclosures required by generally accepted accounting principles for complete financial statements. All adjustments which are, in the opinion of management, necessary for a fair presentation of the results of operations for the interim periods have been made and are of a recurring nature unless otherwise disclosed herein. The results of operations for such interim periods are not necessarily indicative of operations for a full year.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. ORGANIZATION, OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (cont'd)

Long-Lived Assets

In accordance with ASC 350, the Company regularly reviews the carrying value of intangible and other long-lived assets for the existence of facts or circumstances, both internally and externally, that may suggest impairment. Imagine Media LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 5. INCOME TAXES

Deferred income taxes arise from the temporary differences between financial statement and income tax recognition of net operating losses. These loss carryovers are limited under the Internal Revenue Code should a significant change in ownership occur.

At December 31, 2009 and 2010 the Company had net operating loss carryforwards of approximately \$604,000 and \$1,045,000 respectively, which begin to expire in 2027. The deferred tax asset of at each date of \$120,000 and \$209,000 created by the net operating losses has been offset by a 100% valuation allowance. The change in the valuation allowance in 2009 and 2010 was approximately \$21,000 and \$89,000.

NOTE 6. STOCK OPTIONS

The Company accounts for employee and non-employee stock options under ASC 718, whereby option costs are recorded based on the fair value of the consideration received or the fair value of the equity instruments issued, whichever is more reliably measurable. Unless otherwise provided for, the Company covers option exercises by issuing new shares.

The Company's stock option activity is described below.

Non-employee stock options

At the beginning of 2009 the Company had 60,000 non-employee stock options outstanding, allowing the holder to purchase one share of common stock per option, exercisable at \$0.10 per share, with terms expiring from 2011 - 2013. During the year 50,000 options were exercised, and no options expired, leaving a 2009 year end outstanding balance of 10,000 non-employee stock options expiring in December 2011.

During 2010 the Company granted 22,500 options for services, allowing the holder to purchase one share of common stock per option, with 22,500 options exercisable immediately at prices from \$0.10 - \$0.15 per share with the option terms expiring from January 2012 through January 2015. During 2010 no options were exercised, and no options expired, leaving a 2010 year end outstanding balance of 32,500 non-employee stock options. The fair value of the 22,500 options granted in 2010 was estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions: risk free interest rate of 1.08% - 2.67%, dividend yield of 0%, expected lives of 2 - 5 years, volatility of 100%. The Company incurred and recorded compensation expense under these stock option grants of \$53,262 in 2010.

13

NOTE 6. STOCK OPTIONS (cont'd)

During the six months ended June 30, 2011 10,000 options were exercised, and no options expired, leaving a June 30, 2011 outstanding balance of 22,500 non-employee stock options, exercisable at prices from \$0.10 - \$0.15 per share with the option terms expiring from January 2012 through January 2015.

Employee stock options

The Company had no outstanding employee stock options in 2009 or 2010, or during the six months ended September 30, 2011.

NOTE 7. GOING CONCERN

The Company has suffered recurring losses from operations and has a working capital deficit and stockholders' deficit, and in all likelihood will be required to make significant future expenditures in connection with continuing marketing efforts along with general administrative expenses. These conditions raise substantial doubt about the Company's ability to continue as a going concern.

The Company may raise additional capital through the sale of its equity securities, through an offering of debt securities, or through borrowings from financial institutions or others. By doing so, the Company hopes to generate revenues from sales of its alcohol sensing and ignition lock systems. Management believes that actions presently being taken to obtain additional funding provide the opportunity for the Company to continue as a going concern.

Item 2. Management's Discussion and Analysis of Financial Condition and Plan of Operation

The Company was formed in August 2007 to publish and distribute Image Magazine, a monthly guide and entertainment source for the Denver, Colorado area. The Company generated only limited revenue and essentially abandoned its business plan in January 2009.

On September 19, 2011 the Company acquired approximately 52% of the outstanding shares of TransBiotec, Inc., ("TBT") from TBT's directors, in exchange for 12,416,462 shares of the Company's common stock. TBT is a California Corporation. Prior to the acquisition the Company had 1,500,000 outstanding shares of common stock.

The Company is currently acquiring the remaining outstanding shares of TBT from the remaining TBT shareholders in consideration for the issuance of 11,141,348 additional shares of the Company's common stock.

As a result of the acquisition, TBT's business is that of the Company's, and, unless otherwise indicated, any references to the Company include the business and operations of TBT.

TBT as the accounting acquirer in the transaction recorded the acquisition as the issuance of stock for the net monetary assets of the Company accompanied by a recapitalization. This accounting for the transaction was identical to that resulting from a reverse acquisition, except that no goodwill or other intangible assets were recorded.

TBT, headquartered in Seal Beach, California, has developed and patented a high technology, state-of-the-art transdermal sensor, that detects blood alcohol levels through a person's skin. Ethanol is produced as alcohol is ingested and metabolized in the body. The system senses ethanol excreted through perspiration. A person places their finger on the sensor, and within 5-8 seconds, the sensor will detect the ethanol level. A signal can then be sent to output devices that control the ignition in a vehicle to prevent it from starting. The system can also communicate with other devices such as a GPS unit, or cell phone.

The TBT system is unobtrusive, accurate, reliable, durable, low cost, easier to use and faster than the current breathalyzer applications. TBT has completed its beta testing of the sensor and is currently developing its manufacturing capability.

Initially, TBT intends to offer its sensor only for commercial vehicle applications. Later, TBT plans to market its sensor to the public for use in automobiles, SUV's, RV's, boats and other vehicles.

Completion of the Company's acquisition of TBT is subject to the satisfaction of several conditions including without limitation, the execution of a definitive agreement, the satisfactory completion of due diligence by both parties, and the completion of an audit of TBT's financial statements. There can

be no assurance that the transaction will be consummated.

The following discussion:

2

- o summarizes the Company's plan of operation; and
- o analyzes TBT's financial condition and the results of its operations for the the nine months ended September 30, 2011.

This discussion and analysis should be read in conjunction with TBT's financial statements included as an exhibit to this report.

Plan of Operation and Capital Requirements

The Company's plan of operations is as follows:

Activity -----	Projected Completion Date -----	Estimated Cost -----
Develop relationship with initial customers willing to work with Company in refining SOBR. Will discount price for units sold to customers who partner with Company in this phase. Identify add-on features that may appeal to customers. Complete design of printed circuit boards and injection molding tools. Sales target of 500 units.	January 2012	\$160,000
Outsource manufacturing, packaging and shipping. Complete joint venture agreement with GPS partner. Develop add-on features such as cameras, GPS and radio interfaces, and a fingerprint reader which would allow the SOBR to determine the driver's identity and blood alcohol content at the same time. Improve production capability to 1,000 units per month.	March 2012	\$185,000
Improve manufacturing capability to 10,000 units per month	October 2012	\$370,000

The Company will maintain its research and development efforts with a goal of continuously improving the SOBR.

TBT's sources and (uses) of funds for the nine months ended September 30, 2011 and 2010 are shown below:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 5. INCOME TAXES

Deferred income taxes arise from the temporary differences between financial statement and income tax recognition of net operating losses. These loss carryovers are limited under the Internal Revenue Code should a significant change in ownership occur.

At December 31, 2009 and 2010 the Company had net operating loss carryforwards of approximately \$604,000 and \$1,045,000 respectively, which begin to expire in 2027. The deferred tax asset of at each date of \$120,000 and \$209,000 created by the net operating losses has been offset by a 100% valuation allowance. The change in the valuation allowance in 2009 and 2010 was approximately \$21,000 and \$89,000.

NOTE 6. STOCK OPTIONS

The Company accounts for employee and non-employee stock options under ASC 718, whereby option costs are recorded based on the fair value of the consideration received or the fair value of the equity instruments issued, whichever is more reliably measurable. Unless otherwise provided for, the Company covers option exercises by issuing new shares.

The Company's stock option activity is described below.

Non-employee stock options

At the beginning of 2009 the Company had 60,000 non-employee stock options outstanding, allowing the holder to purchase one share of common stock per option, exercisable at \$0.10 per share, with terms expiring from 2011 - 2013. During the year 50,000 options were exercised, and no options expired, leaving a 2009 year end outstanding balance of 10,000 non-employee stock options expiring

in December 2011.

During 2010 the Company granted 22,500 options for services, allowing the holder to purchase one share of common stock per option, with 22,500 options exercisable immediately at prices from \$0.10 - \$0.15 per share with the option terms expiring from January 2012 through January 2015. During 2010 no options were exercised, and no options expired, leaving a 2010 year end outstanding balance of 32,500 non-employee stock options. The fair value of the 22,500 options granted in 2010 was estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions: risk free interest rate of 1.08% - 2.67%, dividend yield of 0%, expected lives of 2 - 5 years, volatility of 100%. The Company incurred and recorded compensation expense under these stock option grants of \$53,262 in 2010.

Employee stock options

The Company had no outstanding employee stock options in 2009 or 2010, or during the six months ended September 30, 2011.

NOTE 7. GOING CONCERN

The Company has suffered recurring losses from operations and has a working capital deficit and stockholders' deficit, and in all likelihood will be required to make significant future expenditures in connection with continuing marketing efforts along with general administrative expenses. These conditions raise substantial doubt about the Company's ability to continue as a going concern.

The Company may raise additional capital through the sale of its equity securities, through an offering of debt securities, or through borrowings from financial institutions or others. By doing so, the Company hopes to generate revenues from sales of its alcohol sensing and ignition lock systems. Management believes that actions presently being taken to obtain additional funding provide the opportunity for the Company to continue as a going concern.

Item 2. Management's Discussion and Analysis of Financial Condition and Plan of Operation

The Company was formed in August 2007 to publish and distribute Image Magazine, a monthly guide and entertainment source for the Denver, Colorado area. The Company generated only limited revenue and essentially abandoned its business plan in January 2009.

On September 19, 2011 the Company acquired approximately 52% of the outstanding shares of TransBiotec, Inc., ("TBT") from TBT's directors, in exchange for 12,416,462 shares of the Company's common stock. TBT is a California Corporation. Prior to the acquisition the Company had 1,500,000 outstanding shares of common stock.

The Company is currently acquiring the remaining outstanding shares of TBT from the remaining TBT shareholders in consideration for the issuance of 11,141,348 additional shares of the Company's common stock.

As a result of the acquisition, TBT's business is that of the Company's, and, unless otherwise indicated, any references to the Company include the business and operations of TBT.

TBT as the accounting acquirer in the transaction recorded the acquisition as the issuance of stock for the net monetary assets of the Company accompanied by a recapitalization. This accounting for the transaction was identical to that resulting from a reverse acquisition, except that no goodwill or other intangible assets were recorded.

TBT, headquartered in Seal Beach, California, has developed and patented a high technology, state-of-the-art transdermal sensor, that detects blood alcohol levels through a person's skin. Ethanol is produced as alcohol is ingested and metabolized in the body. The system senses ethanol excreted through perspiration. A person places their finger on the sensor, and within 5-8

seconds, the sensor will detect the ethanol level. A signal can then be sent to output devices that control the ignition in a vehicle to prevent it from starting. The system can also communicate with other devices such as a GPS unit, or cell phone.

The TBT system is unobtrusive, accurate, reliable, durable, low cost, easier to use and faster than the current breathalyzer applications. TBT has completed its beta testing of the sensor and is currently developing its manufacturing capability.

Initially, TBT intends to offer its sensor only for commercial vehicle applications. Later, TBT plans to market its sensor to the public for use in automobiles, SUV's, RV's, boats and other vehicles.

Completion of the Company's acquisition of TBT is subject to the satisfaction of several conditions including without limitation, the execution of a definitive agreement, the satisfactory completion of due diligence by both parties, and the completion of an audit of TBT's financial statements. There can be no assurance that the transaction will be consummated.

The following discussion:

2

- o summarizes the Company's plan of operation; and
- o analyzes TBT's financial condition and the results of its operations for the the nine months ended September 30, 2011.

This discussion and analysis should be read in conjunction with TBT's financial statements included as an exhibit to this report.
